

GP Tips 'n' Tricks from Altico

There are dozens of little tips and tricks for using your Microsoft Dynamics GP system that can make your life ever so much easier. We'll be bringing you a new tip every month in the hope that you find them useful.

The resident Altico wizard presents your March 2008 GP tip:

Changing Account Segment Names

By default, the system names each segment of the account number format with the bland names such as Segment1, Segment2, Segment3, et cetera. These names can be changed to meaningful names such as Main, Site, Division, et cetera.

The Account Format Setup window (Tools -> Setup -> Company -> Account Format) is used to rename segments. Simply highlight the current segment names in the Name column of the window and enter the desired new name. Click OK when done to save the changes.

Note that FRx also uses the segment names and will pull these new names from the Dynamics GP tables.

I'm NOT the resident wizard, but be that as it may, you're welcome to channel your questions through me.

Yours,

Marcia Nita Doron
Marketing Director
