

GP Tips 'n' Tricks from Altico

There are dozens of little tips and tricks for using your Microsoft Dynamics GP system that can make your life ever so much easier. We'll be bringing you a new tip every month in the hope that you find them useful.

The resident Altico wizard presents your March 2010 GP tip:

Need Multiple SAs?

There are times when other people may need the powerful rights of the SA (System Administrator). However, handing out the SA password means it needs to be changed to re-secure the system. Here is an alternative.

In the SQL Management Studio (or Enterprise Manager if using an older version of GP) find the User ID of the user needing SA rights. Add that user to the SysAdmin role of SQL. That's all it takes!

Now this user has all the rights of SA and can set up users, et cetera. When these rights are no longer needed, simply remove this user from the SysAdmin role in SQL.

* * *

I'm NOT the resident wizard, but be that as it may, you're welcome to channel your questions through me.

Yours,

Marcia Nita Doron
