

GP Tips 'n' Tricks from Altico

There are dozens of little tips and tricks for using your Microsoft Dynamics GP system that can make your life ever so much easier. We'll be bringing you a new tip every month in the hope that you find them useful.

The resident Altico wizard presents your April 2010 GP tip:

One Account, Multiple Bill-To Addresses

Why would you ever have multiple bill-to addresses? Well, insurance claims come to mind. There is one client that is ultimately responsible but they have several insurance firms that need to pay their share. Here is how to accomplish this.

Create an account for the one person or firm that is ultimately responsible for the bill. In the address table, create multiple billing addresses. The first line of each address references the name of the insurance firm that will be paying, the second line lists "For: ABC Law Firm" (the real client), and the rest of the address information is the address of the payer.

Now invoices can be cut against the one customer number and the appropriate payer selected in the Bill To Address ID field.
