

GP Tips 'n' Tricks from Altico

There are dozens of little tips and tricks for using your Microsoft Dynamics GP system that can make your life ever so much easier. We'll be bringing you a new tip every month in the hope that you find them useful.

The resident Altico wizard presents your July 2010 GP tip:

Pop-Ups on SOP Transaction Entry

If you're like me and you've come to rely on Outlook pop-up reminders, you'll appreciate the value of this tip.

Microsoft Dynamics GP users have long been asking for a way to have a message pop up during Sales Order Entry when there is a problem or special requirements associated with a customer. While GP out of the box does not support this, where there's a will there's a way and it can be done.

Using the full version of Extender, a window can be crafted that shows messages to users. This window can be triggered to open when the user tabs out of the customer number field **only upon special conditions**.
