

## GP Tips 'n' Tricks from Altico

There are dozens of little tips and tricks for using your Microsoft Dynamics GP system that can make your life ever so much easier. We'll be bringing you a new tip every month in the hope that you find them useful.

The resident Altico wizard presents your September 2010 GP tip:

### **Printing Selected Pages from the Screen Display**

When a report is printed to the screen, the window allows the user to send the displayed report to a printer. Out of the box, however, Dynamics GP sends the entire report to the printer. To allow users to select specific pages to be printed, edit the Dex.ini file and change the NoPrintDialogs line to FALSE. This will cause a window to open allowing users to select the pages to be printed and change the number of copies to print.

I'm NOT the resident wizard, but be that as it may, you're welcome to channel your questions through me.

Yours,

Marcia Nita Doron  
Marketing Director
